RESISTANCE OF SPECIES OF PERSEA TO AVOCADO ROOT ROT

G. A. Zentmyer and C. A. Schroeder

G. A. Zentmyer, Plant Pathologist, Citrus Experiment Station, University of California, Riverside; C. A. Schroeder, Associate Subtropical Horticulturist, University of California at Los Angeles,

With the increased seriousness of the avocado root rot problem in California a concerted effort is being made to find a rootstock resistant to **Phytophthora cinnamomi**. A number of additional collection have been made in recent years in the search for a resistant rootstock and for breeding material (1, 2, 3).

These materials have been tested for resistance to **Phytophthora cinnamomi**, on the Riverside campus. Results of these tests, together with earlier tests of other species (4) are presented below. Tests for compatibility of the various species with avocado have been conducted on the Los Angeles campus; results of these trials are presented in another paper in this Yearbook by Frolich, Schroeder, and Zentmyer.

Tests for resistance have been carried out in soil and in nutrient solution in the greenhouses at Riverside. A number of the collections showing resistance in greenhouse tests have been tested further in field plantings, with comparable results to date.

Resistance of Species of Persea and Other Related Plants to Phytophthora cinnamomi

Species	Source	Resistance
Persea americana (avocado)	California, Latin America	generally low
P. borbonia	Southeast U.S.	high
P. caerulea	Venezuela	high
P. chrysophylla	Colombia	high
P. Skutchii	Honduras, Costa Rica	high
Persea species M2	Mexico	high
Persea species M3	Mexico	high
Species of Nectandra Ocotea, Phoebe	Latin America	moderately high
P. Donnell-Smithii	Guatemala	generally high, but variable
Umbellularia californica	California	moderate
P. durifolia	Peru	moderate
P. floccosa	Mexico	low
P. gigantea	Honduras	low
P. lingue	Chile	low
P. longipes	Mexico	low
P. indica	Canary Islands	very low
P. nubigena	Guatemala	low
P. Schiedeana	Guatemala, Mexico, Costa Rica	generally low, but variable
P. portoricensis	Puerto Rico	low
P. sp. (aguacate Mico)	Guatemala, El Salvador	low
Cinnamomum camphora	East Indies	low
